

You might make backups, but they might not be as secure as you think.

Many companies make the error of believing their data is safe just because they make a tape backup. But there's more to securing your data than just a backup tape.

- Do you use the same tape every day, or do you have a set of tapes?
- Are the tapes taken offsite on a regular basis?
- Is the offsite location secure?
- How easy is it to restore the data in case of disaster?

Offsite Data Storage is something BCM Computer Technologies takes very seriously. With our Offsite Backup System, your data is transferred automatically every night without any user intervention required. Data is sent over the Internet encrypted, so nobody can steal your sensitive information. Verification emails are sent to network administrators to verify that the backup ran successfully. No tapes to change, no maintenance required. It couldn't get any easier than this.

A minimum of 5 days worth of backups are stored, and you have instant access to all of your data. Additionally, you have the option of receiving a DVD set of your data on a regular basis if you wish.

is your data secure?

The BCM Offsite Backup System is the right solution for you.

Tape backup systems may seem affordable, but when you take into account the equipment, media, and human resources for maintenance, it can become quite expensive.

Tape Drive (average 3 year lifespan): \$1500
 Set of 6 Tapes and Cleaning Tape: \$550
 Maintenance*: \$500

Annual Cost of Tape Backup System**: **\$2550**

Annual Cost of BCM BackupPremium**: **\$599**

* based on daily tape changes, weekly cleaning cycles, annual tape replacement, tape drive installation, and software & backup scheduling setup

** plus applicable taxes

| List of Benefits | Tape Backup | BCM Offsite |
|---|-------------|-------------|
| Makes a backup of your important data | ✓ | ✓ |
| Offsite backup | Possible | ✓ |
| Keeps multiple copies of your data over multiple days | ✓ | ✓ |
| Email notification of successful backup | ✓ | ✓ |
| Doesn't require user intervention | | ✓ |
| Instant access to all of your data without requiring an entire dataset be restored - you can pick and choose individual files | | ✓ |
| "Fire and forget" - once it's set up, you don't have to do any maintenance | | ✓ |
| Monthly Backup Sets on DVD | | ✓ |
| Cost effective - See packages on right | | ✓ |

The BCM Offsite Backup System is flexible and secure. Your data is transmitted over the Internet via an SSL-encrypted tunnel, ensuring that your private data is protected from intruders.

Backups are scheduled to run automatically, so you don't need to remember to back up your data. You can choose the backup schedule that suits your needs - weekly, nightly, or every few hours. Backups can also be triggered manually, so essential files can be backed up immediately for instant backups.

Each client's data is stored in its own "jail", so that your data remains completely private and is never co-mingled in with someone else's. Once your data has been mirrored onto our servers, it is mirrored once again to guarantee that your data will never be lost.

Peace of mind
is at hand,
at last.

BCM Offsite Backup System Packages

BackupLite **\$19.95/mo**
